

ACZ Laboratories, Inc.

A Full Service Environmental Testing Laboratory

Residential Groundwater Testing

ACZ Laboratories has three water testing packages intended to meet the needs of area homeowners, private well systems and real estate agents. The packages are partly based on State of Colorado drinking water regulations and the EPA's primary and secondary drinking water standards. *BTEX analysis can be added to any of the three lists if organic contamination is a concern based on local oil and gas exploration or production near the groundwater well being tested (see below). ACZ is NELAC certified to run BTEX via EPA method 8260. This data should be used for screening purposes only.

Turn-Around-Time (TAT) is 15 working days for packages 1 & 2 and 20 working days for package 3, holidays not included. Depending on workload, TAT may increase up to 5 additional working days. Expedited TAT of 5 working days is available only on a pre-approved basis prior to sample receipt and a 100% surcharge. Please note that if your analytical results are to be used in a real estate closing, be sure to allow ample time for analysis prior to that date.

Service fees are due and payable upon receipt of sample(s) at the laboratory. Forms of payment are cash, check, Visa, MasterCard and American Express.

Included in the package prices are all necessary sampling containers and instructions. Should you have any questions, please feel free to call an ACZ Client Services Representative at (970) 879-6590.
