Job Description

LIMS Developer

Summary of Position
ACZ Laboratories is looking for a highly motivated software engineer to join our small IT team. This team member will assist in maintaining and developing ACZ's LIMS system. The position also participates in software testing processes and may be involved in daily technical support to other internal departments.

ACZ offers flexible schedule, fantastic co-workers, visionary management and a casual and comfortable office environment, all set in a beautiful mountain town in the Colorado Rockies. **Powder clause included for those epic ski days, and flexible schedules for when the fish are biting or the trails are calling. Potential to work remotely after initial training period.

Responsibilities
Develop and evolve ACZ's LIMS software - including analysis & design, development, testing, and implementation. Provide project and status reports to internal team leader.

Employ excellent organization skills, ability to multi-task and handle multiple project priorities within a given day/week.
Other duties as assigned.

Minimum Qualifications
• Self-starter with appetite for solving problems in complex systems, candidate must be willing and able to learn new skills quickly and efficiently
• 1+ years of experience working in software engineering
• Proficiency in working with and writing SQL and PL/SQL, and in systems testing and validation
• Experience working with databases and with an object-oriented programming language
• Confident taking direction and working with a development team
• Ability to interpret and implement from user requirement specifications
• Excellent written and verbal communications skills

ACZ's Environment
ACZ has a casual and comfortable office environment, with regular opportunities to dine out with your team or volunteer with other co-workers.

You would be joining ACZ's IT team of 3 other people (LIMS Administrator, Systems Administrator, and IT Manager with technical experience) in a small company of approximately 60 employees.

ACZ uses Windows OS workstations with our LIMS database on a Linux server. Project progress tracked with Gantt charts but we're open to suggestions.

This is a salary position, DOQ.

Job Type: Full-time
